

STATEMENT

C025 Risk Appetite & Tolerance

Introduction

Risk Management is an essential component of Council's governance framework and supports the achievement of Council's goals and objectives. Effective risk management increases the probability of successful outcomes whilst protecting the reputation and sustainability of Council.

The risk appetite is the amount of risk an organisation is willing to accept in pursuit of its strategic goals. The Risk Appetite & Tolerance Statement (RATS) considers the most significant categories of potential risks to Council and provides an outline as to how much risk Council is willing to accept in this area.

Risk Appetite

Council, its subcommittees, management and staff (including contractors and volunteers) will consult Council's Risk Appetite in both strategic and operational decision making. Council's vision and strategic objectives will necessitate that Council accept some risks that accompany growth, transformation, innovation and are proportionate with the potential reward.

Overall, Council has a balanced approach to its risk appetite aligned to its strategic objectives. Council's approach to risk appetite is to minimise our exposure to risks to our people and their safety, our reputation and corporate governance whilst accepting and encouraging an increased degree of risk in pursuit of our key strategic directives.

The overall level of risk that Council accepts can range from avoiding risks to eagerly taking risks. Where Council's appetite fits on this range can impact on its willingness to innovate, as well as its requirement to control risks. Council's overall risk appetite is 'Cautious' with certain categories of risks having different risk tolerances.

Council's risk appetite is further described in the below Risk Appetite Statement and Risk Tolerance Scale over the page.

Council categorises its level of risk appetite into four categories as can be seen below:

Risk Averse	Cautious	Open	Risk Positive
<ul style="list-style-type: none">• No to very low appetite for taking risks• Avoid risks and uncertainty• Will not take risks to achieve potential rewards	<ul style="list-style-type: none">• Low appetite for risks.• Prefer safe options.• May impact on potential opportunities for reward.	<ul style="list-style-type: none">• Moderate appetite for risks.• Willing to consider potential costs and benefits – rewards and risks – when deciding options.	<ul style="list-style-type: none">• Eager to engage with risks and choose options offering potentially higher rewards.

Overarching Risk Appetite Statement

Hindmarsh Shire Council's risk appetite is 'Cautious'. Council will consider options and choose one that is safe, but also may maximise its ability to innovate, deliver strategic priorities and services, and care for the safety and wellbeing of staff, while also providing an acceptable level of reward and value for the community it serves and for local government.

Risks will be managed in line with Hindmarsh Shire Council's risk appetite and risk tolerance scales and will be considered in all decision making and planning.

The Risk Appetite Statement summarises the Council's tolerance for risk in each of a whole range of activities it undertakes. For example, the Council's tolerance for risk in health and safety matters is very low; hence a highly cautious (low) appetite for that category. On the other hand, tolerance for risk in service delivery is conservative (relatively moderate). All of the activities undertaken by Council can be so classified in terms of risk appetite.

Risk Tolerances

Risk tolerances are the boundaries set for risk taking. The risk appetite statement informs the development of risk tolerances for Council and provides guidance on how the Risk Appetite Statement is to be applied to everyday business actions and decisions.

While risk appetite is a qualitative statement, risk tolerances operationalise the statement by using quantitative measures where possible to better enable monitoring and review.

The Risk Appetite will set the tone for risk taking in general, whilst the tolerance informs:

- Expectations for mitigating, accepting and pursuing certain types of risk
- Boundaries and thresholds for acceptable risk taking
- Actions to be taken or consequence for acting beyond appropriate tolerances.
